## Notes:

1. SEO results are based on 600 words =4055 characters.
2. CSS, image and J avascript file count and sizes are measured before the use of any included CSS & J S minifiers / compressors
3. RTL (right to left) testing is done with Arabian ar-AA language pack. Backend and frontend was set on default for ar-AA and after that frameworks and their Respective files are installed.
